I KNOW MY LIFE PURPOSE. WHAT'S UP?

Life purpose is not a goal!! It is imprinted in your finger tips 5 months before you were born. It must have reason what for... Life purpose is not circumstantial, it is YOU inside your body yearning for deeper meaning on this planet. It is your soul psychology, objective and personal. You don't have to be spiritual or non spiritual, young or not quite anymore, smart or educated. It does not matter!!! Your life purpose remains the same throughout your life time and never changes. What changes, is the progress you make living your life to its fullest as promised in your finger prints or you are behind with your midterm in the university on planet earth as Richard Unger founder of this technique pointed out. However, it is never too late to become aware of your highest potential. Can you change your life then? Absolutely!!! Awareness of what is really going on inside of you changes perception , concept of free will and capability to make choices shifts from an abstract pleasant dream from the movies “Secret” or “Moses code” into actuality of your personal life movie. You already own your screen script whether you are aware of it or not. Become your personal producer. LET'S GET STARTED!!!!
